Harmonious habitat: Our Story

Holy Spirit School is working towards being more environmentally aware. We decided to restore an area of our school which was severely eroded, by creating a native habitat.

We were successful in obtaining an Eco Schools Grant. This grant would allow us to regenerate an area of the school. Students in our newly formed Environment Team discussed ideas for the native garden. Working bees were organized and students worked hard mulching the new garden beds.

Planting begins: Harmonious Habitat is taking shape

Harmonious Habitat at the end of 2010

The Environment Team continues to enjoy working in and maintaining our Habitat garden.
